PERSONAL PROJECTS

Pix Player (Android -Kotlin)

- This is a Live Streaming Android TV like (Netflix, Amazon Prime) in which a user can watch the favourite TV shows and Movies.

LinkHR

- This is a job searching platform inspired by LinkedIn, featuring a unique swipe functionality. This innovative feature allows users to apply for jobs quickly and effortlessly by simply swiping, streamlining the application process and enhancing user engagement

WorkWhiz (FYP)

- This is a home service app that allows users to hire workers like plumbers, electricians, and cleaners from the comfort of their homes. The app lets users browse profiles, read reviews, and book services easily and conveniently.

Enhancy

- This is an AI-powered application called **Enhancy**. The app allows users to upload a picture, which is then enhanced through an API that improves its pixel quality. Once the enhancement is complete, Enhancy displays the before and after images side-by-side, highlighting the improvements made to the picture.

SecureVault

- This is an application that securely manages user data by storing it in an encrypted format using SQLite in Flutter. Whenever data is retrieved, it is decrypted automatically, ensuring that all information remains secure and protected while still being easily retrievable and accessible to authorized users.

IntelliTask

- This is an AI To-Do List app that takes tasks from the user and sends them to an API that uses AI to assign a priority level. The API analyzes the task's importance and urgency, returning a priority value that helps users focus on what matters most.

ACHIEVEMENTS

Flutter App Development Course (Udemy)

Making the Android Applications using flutter

Android Development Course (Native)

Learn how to use MVVM architecture and jet pack compose
