## PERSONAL PROJECTS

### Telephone Directory

- Worked as an intern at RINL vizag and there me and my team worked on this project which is called as telephone directory webpage which is used internally by the employees in this organization.

### BEAM

- BITS EDUCATIONAL AND APPLICATION MANAGEMENT it an android application that I and my team developed for our college where all the individual needs like Study materials, Notifications, Score card, etc.. of both students and professors can be placed at one place.
- I am the leader and initiator of this project.
- I learned a new programming language for this application.
- Organized my team to learn and help in the project completion.
- Project is written in dart with flutter sdk as front end.
- Used nodeJs for back end of the application.
