

GOGUL VEERAMANI M

Flutter Developer

3+ Years of experience

PROFILE

Flutter Developer with **3 years of experience** in building **high-performance** mobile applications for **Android** and **iOS**. Skilled in **Dart**, **Firestore**, and **state management (BLoC, Provider)**. Experienced in developing **feature-rich apps**, **integrating APIs**, and following **clean architecture** principles. Worked on projects across various domains, including **social media**, **e-commerce**, **EV charging**, and **finance**. Passionate about writing **efficient, maintainable code** and staying updated with the latest **Flutter advancements** to create **seamless user experiences**.

WORK EXPERIENCE

Software Engineer - Flutter GAVS Technology Pvt Ltd

02/2024 - 10/2024 CHENNAI, TAMIL NADU, INDIA

Worked with a **25-member team** to develop the **ABCD Super App**, a financial solutions platform. Focused on **Flutter development** for Android and iOS, optimizing performance and usability. Collaborated with cross-functional teams to ensure timely feature delivery and business alignment.

Flutter Developer STEAM-A Private Limited

06/2023 - 11/2023 COIMBATORE, TAMIL NADU, INDIA

Developed a **Flutter-based e-vehicle charging app** with **Google Maps integration** for real-time tracking, **Firestore for secure data management**, and Paytm for seamless **payments**. Implemented CI/CD pipelines for efficient deployment and conducted thorough testing, reducing crash rates by **30%**.

Flutter Developer CuteWeb Solutions

05/2022 - 06/2023 PUDUKKOTTAI, TAMIL NADU, INDIA

Managed the **full mobile app development lifecycle**, ensuring **high-quality deliverables** from design to deployment. Implemented **Provider for state management**, enhancing responsiveness and user experience. Conducted **code reviews** and collaborated with the team to maintain **coding standards and code quality**.

PROJECTS

Spotify Clone App

Description: Developed a Spotify clone app using **Flutter**, with **BLoC (Cubit)** for state management and **Firestore for authentication and data storage**. Followed clean architecture for scalability and integrated songs from **Pokkiri** for a unique touch.

Source Code: [Spotify-Clone](#)

Flutter Location Tracker with SQLite

Description: Developed a Flutter application that allows users to create accounts using **SQLite for local storage**. Implemented location tracking functionality to fetch **location** data in both foreground and background modes.

Technologies Used: Flutter, SQLite, Location Services

Source Code: [SQLite-Flutter](#)

Delivery App

Description: Developed a **delivery app** with features like **order management**, **real-time tracking**, and **secure payment integration**. Implemented a **smooth user experience** with optimized performance.

Technologies Used: Flutter, Firestore, Rest API's
